SUMMARY

Computer Science Engineering student with a strong foundation in Java, SQL, and web technologies. Experienced in developing practical projects and applying programming concepts to solve real-world problems. Seeking a Software Engineer – Java role to contribute technical skills while continuing to grow as a software professional.

EDUCATION

St. Joseph's Institute of Technology

Bachelor of Engineering (B.E.) – Computer Science and Engineering
CGPA: 8/10

07/2023 – 05/2027

Chennai, Tamil Nadu

SKILLS

- **Java** (Core Java, OOP, Collections, Exception Handling, JDBC)
- **Data Structures & Algorithms** (Arrays, Strings, Searching, Sorting, Two Pointer, Sliding Window, Binary Search, Stack)
- **Frontend Development** (HTML, CSS, JavaScript, React.js)
- **Spring Boot** (REST APIs, Spring MVC, Dependency Injection, JPA, Hibernate)
- **Database Management** (MySQL, SQL, MongoDB)
- **Development Tools** (Git, GitHub, VS Code, Maven)
- **Core CS Concepts** (DBMS(NPTEL Certified), Operating Systems, Computer Networks)

PROJECTS

SmartCare – Healthcare Management System

03/2026 – 05/2026

Java | Spring Boot | HTML | CSS | JavaScript | MySQL

- Developed **SmartCare**, a digital healthcare and wellness platform that helps users access healthcare information and services conveniently.
- Implemented features for **doctor and hospital discovery, diet and nutrition guidance, yoga and exercise resources, home remedies, and healthcare educational videos.**
- Designed the platform to support users who may have difficulty accessing healthcare facilities in person by providing **remote healthcare resources and health-awareness content.**

JDBC Database Connectivity

03/2026 – 03/2026

Java | JDBC | MySQL

- Developed a Java-based project to establish connectivity between an application and a MySQL database.
- Implemented database operations for executing SQL queries and processing results.
- Applied JDBC concepts for reliable database interaction.

Weather App – Real-Time Weather Information System

05/2026 – 05/2026

HTML | CSS | JavaScript | Weather API

- Developed a real-time weather application for searching weather information by location.
- Integrated a Weather API to display live temperature and weather conditions.
- Built a responsive and user-friendly interface.

CERTIFICATES

- **NPTEL – Database Management Systems** (Silver Certification | Score: 75% | March 2026)
- **Infosys Springboard – Java Programming** (Completed)
- **Infosys Springboard – React.js** (Completed)
